

Make your own Shark Riddle Teller

Will you find a riddle? Will you find a tooth?
Make your own riddle teller to share with friends.

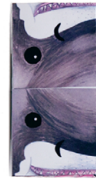

Step 1: Cut out the large square below. Turn it over and fold each corner point toward the center.

Step 2: Turn the paper over so the flaps are face down, and fold all four corners toward the center.

Step 3: Fold the paper in half. Unfold the paper and fold in half the other direction.

Step 4: Unfold. Put your thumbs and first two fingers into the pockets. Push all four corners together.

Step 5: Play! Ask your friend for a number. While counting, open your thumbs and fingers in one direction, then the other (to open and close the opening in different directions). If you end up on the riddles, ask a riddle! If you end with the shark mouth, lift a flap to discover a hidden tooth.
